Rain or no rain, the team captains and members hustled with good results and when they turned in their reports after the \$.30 supper at the association building there was plenty of reason for enthusiastic cheers when it was found that the total subscriptions for the day were \$1,119,50 from \$5 subscribers. scribers. The figures a year ago were \$1,037.50 from 76 subscribers on the first day of the canvass. Impressed by Past Year.

When the men gathered for supper, which was nicely served by the ladier of the First Congregational church, experiences of the canvassing were swopped by the different men who had swopped by the different men who had been out during the day and much mention was made of the favorable impression made for the association in the community by its record of membership gain in the past year, an increase of 157, which brings the present membership up to 442 consisting of 127 boys, 315 men. This is ascribed largely to the four shop socials through which men in industrial life were reached, and also to the address of Dr. Tupper before the day and much long before the field had finished. Mrs. Ronald H. Barlow of the Merion Cricket et ciub of Philadelphia still maintained the community bearing the context for the champlonship in the women's castern golf association tournament today.

It is apparent that Miss F. C. Osgood, present holder of the eastern title, has practically no chance of repeating her victory of last year, as she is 184.

With this done and its merits once demonstrated they will then be ready to go ahead on a larger scale, with the \$500 car. He also has a proposition for a fuel oil engine which promises well, and it is claimed that there is a big field for this kind of an engine and that many orders could be filled today. that many orders could be filled today if it was on the market.

The columns are all carved, but with the exception of the carv-ing the woodworking is highly polish-ed. There is a come ton and on the ed. There is a come top and on the seat hox are carved panels instead of broadcloth. The car is symmetrical throughout and probably the handsomest in the city. The carved panels on the sides and ends are in the form of draperies covering the entire side of the hearse, with the exception of a small space at each side where the small space at each side where the silver urn inside shows. The trimside of the driver's seat are attractive silver decorated lamps, inside of which are minitature carved draperies. Inside, the car is finished in bird's-
